NETFLIX

01 Project Overview

Objective

Simulate the analytical workflow of a Netflix EMEA Production Finance Data Analyst - extracting, cleaning, modelling and visualising content and spend data across EMEA markets.

Data Sources

Netflix Titles Dataset (8,807 titles via Kaggle). Modelled financial data built on Netflix 2024 Annual Report and industry production cost benchmarks.

Tools Used

Python (Pandas, NumPy, Matplotlib, Seaborn). SQL via SQLite in Jupyter Notebooks. Google Sheets for stakeholder summary. Power BI for dashboard visualisation.

NETFLIX

EMEA At A Glance

Top Market by Volume

736 titles produced

$5.6B

UK Modelled Budget

Largest EMEA spend market

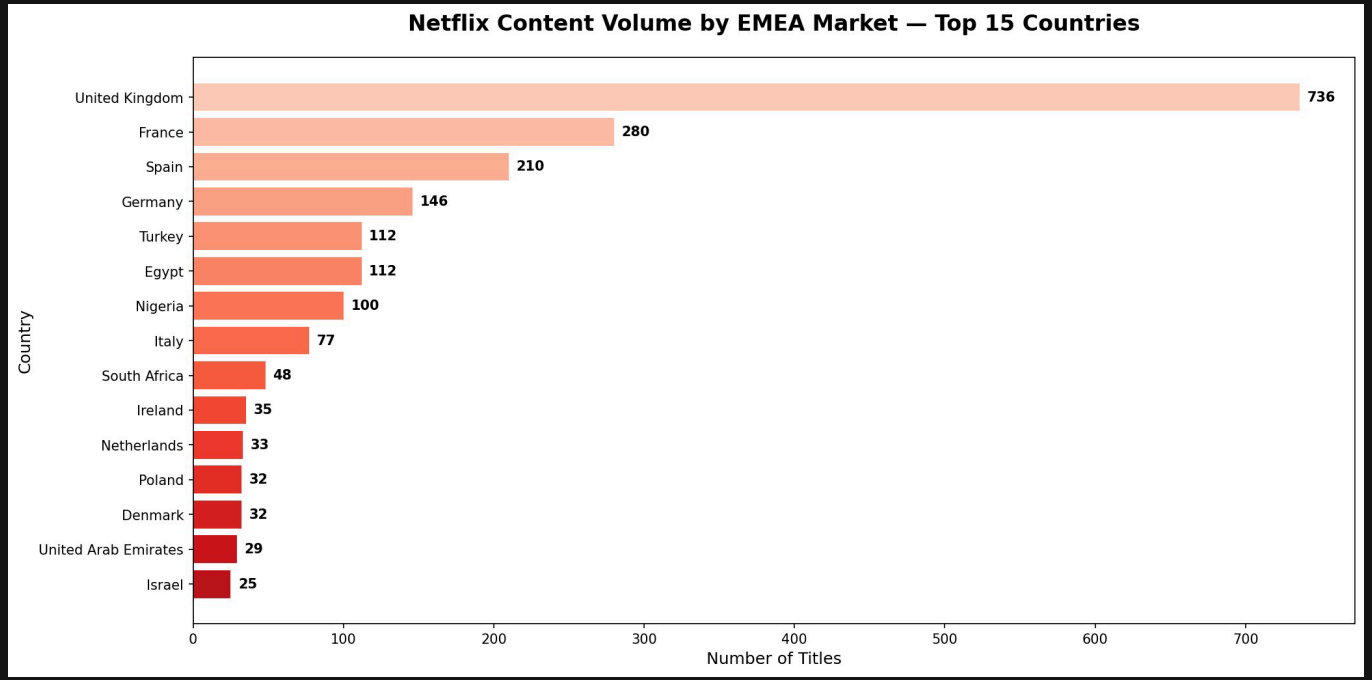
3.9%

Africa vs Europe Cost Gap

Markets rapidly converging

NETFLIX

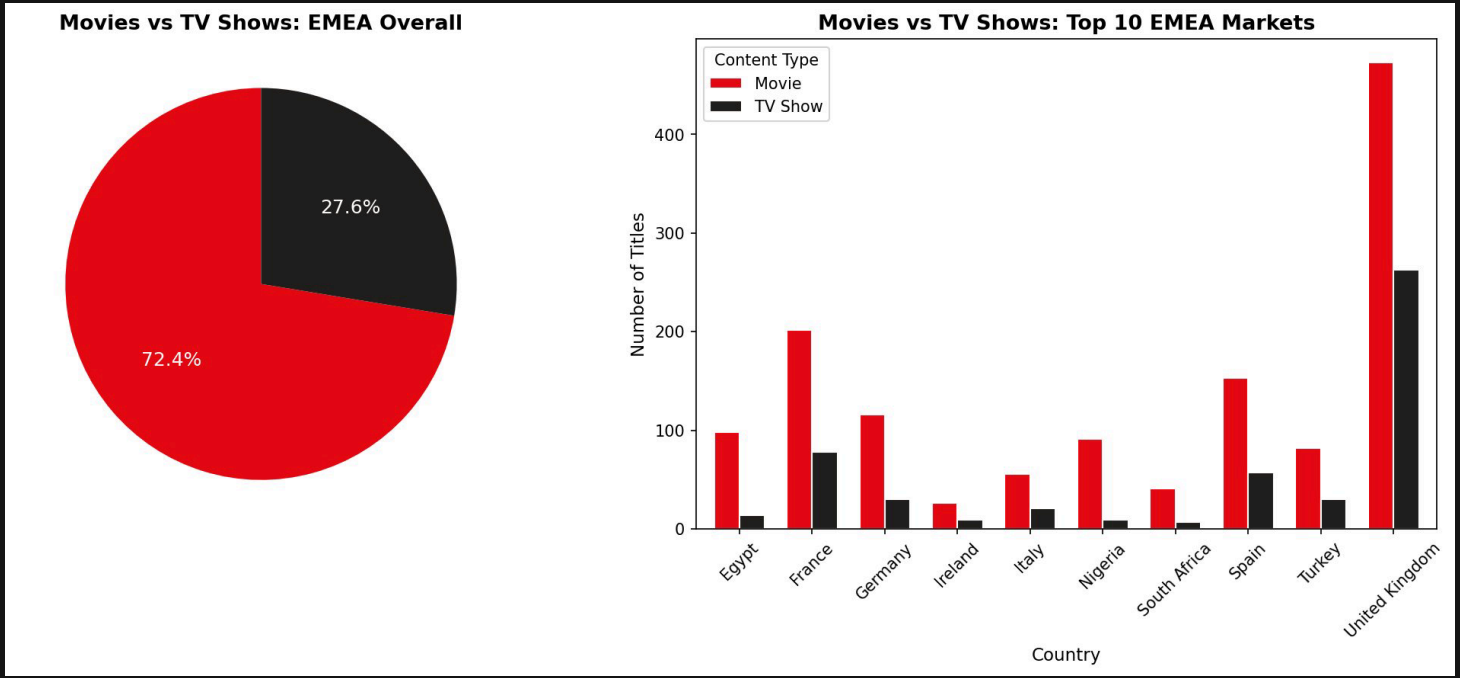
02 Content Volume by EMEA Market



United Kingdom leads EMEA with 736 titles - more than double second-placed France (280). Nigeria ranks 7th globally representing Africa's strongest content market.

NETFLIX

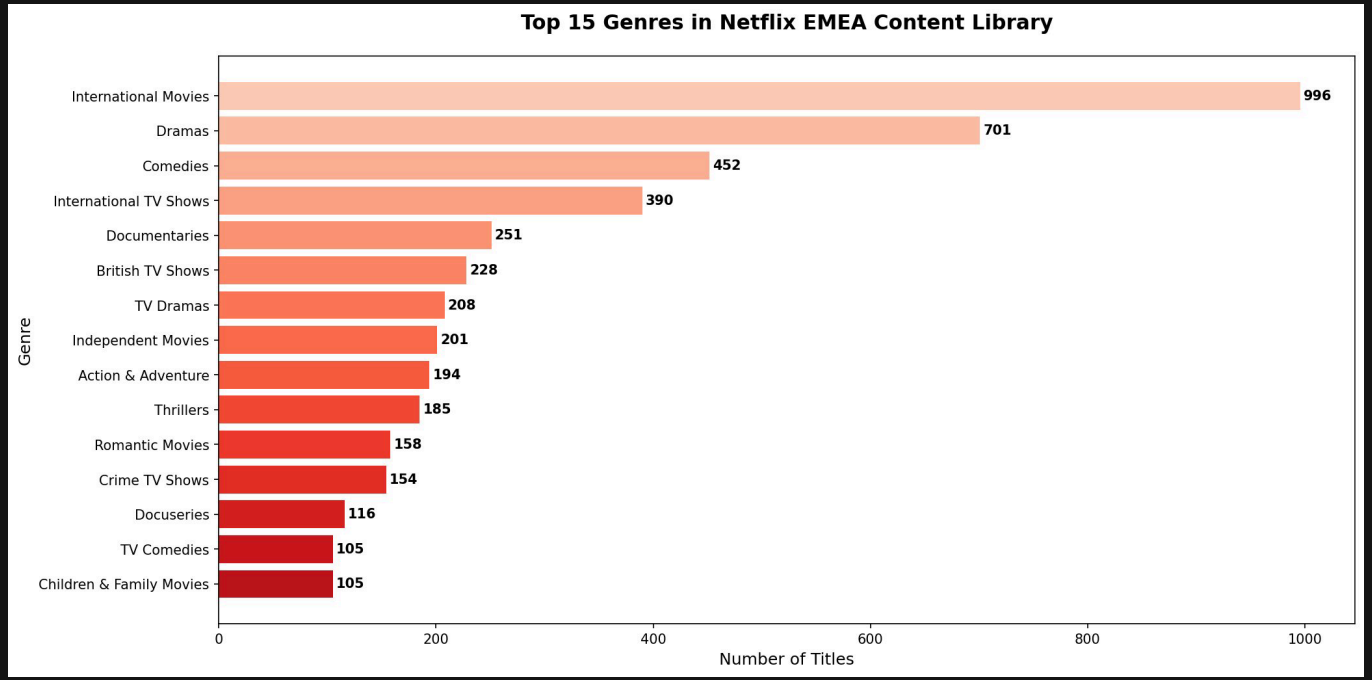
03 Content Type and Genre Breakdown



Movies account for 72.4% of EMEA content. The United Kingdom leads TV Show production while Egypt and Nigeria skew heavily toward Movies.

NETFLIX

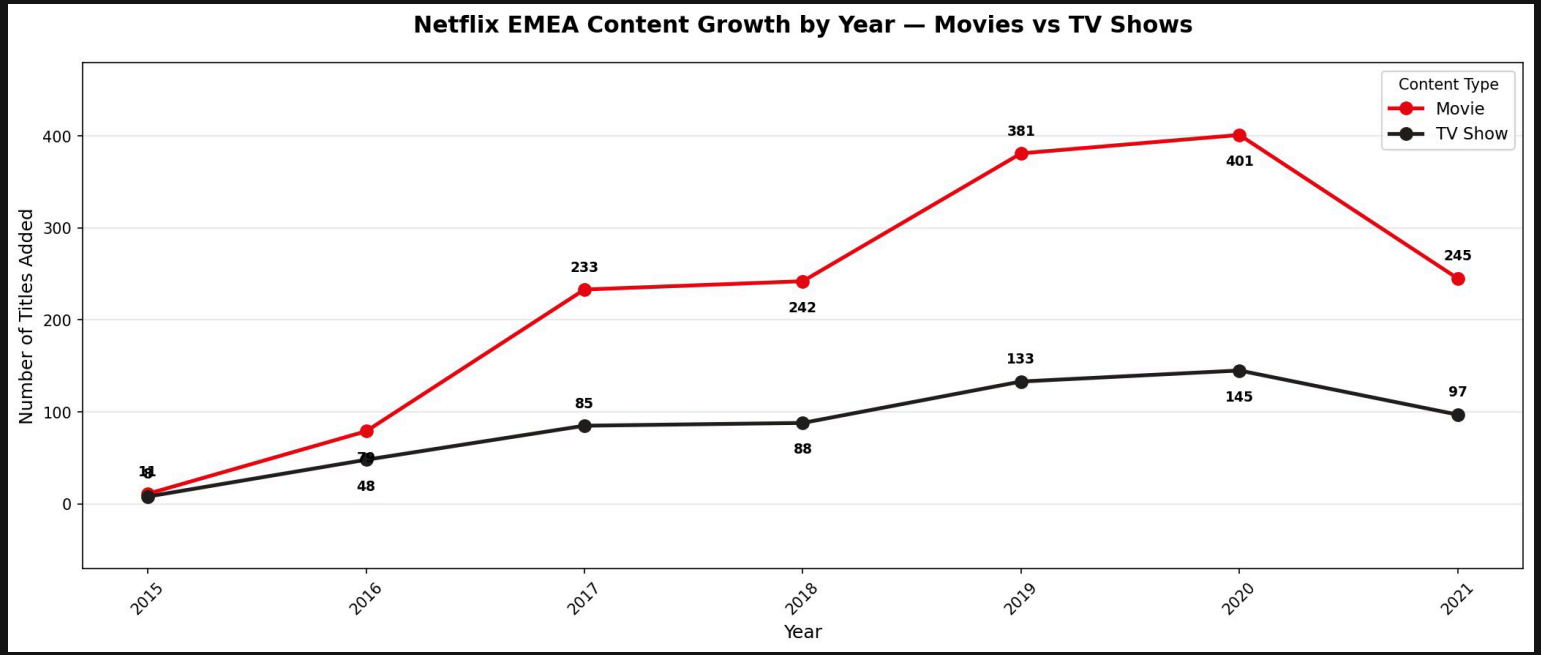
03 Top Genres Across EMEA



International Movies and Dramas dominate, reflecting demand for locally produced culturally relevant storytelling across EMEA markets.

NETFLIX

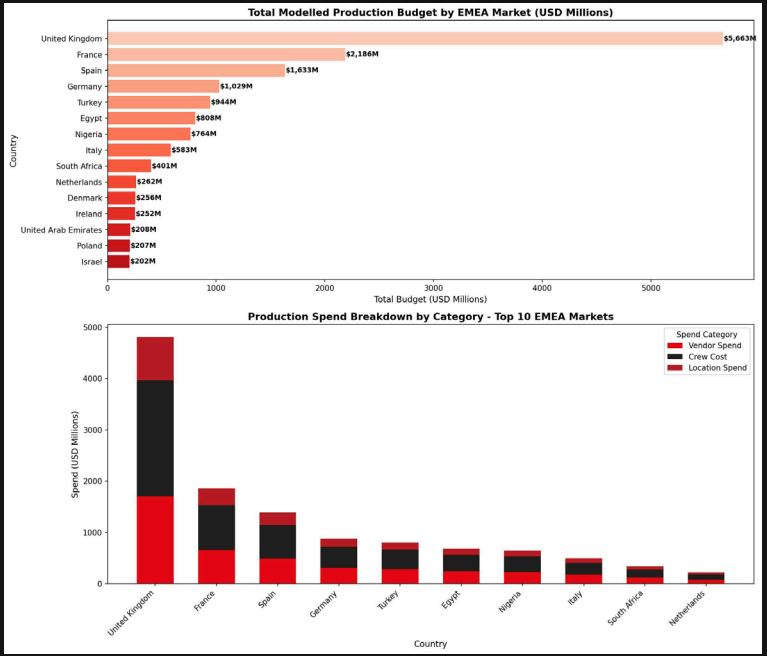
04 EMEA Content Growth 2015 to 2021



Key Insight: EMEA content additions peaked in 2020, driven by the global pandemic streaming surge. Netflix accelerated acquisitions to serve record subscriber growth across the region.

NETFLIX

05 Production Finance Modelling



Methodology: Budgets modelled from Netflix 2024 Annual Report (17B global spend, 20% EMEA). Vendor spend 30%, crew cost 40%, location spend 15% of production budget per title.

NETFLIX

06 The African Market Opportunity

1.4B

Potential subscribers across Africa

3.9%

Cost gap vs European productions

103

Nigerian titles - 7th in EMEA

3

Underserved markets: Kenya, Ghana, Ethiopia

Strategic Context

The 3.9% cost difference between African and European productions signals that Netflix has already invested in African production infrastructure, bringing local costs closer to European levels.

The strategic case for continued African investment is not cost efficiency. It is audience reach. Africa represents 1.4 billion potential subscribers across a rapidly growing middle class that European content cannot effectively serve.

NETFLIX

07 Strategic Recommendations

01 Accelerate African Investment

Nigeria, South Africa and Kenya show strong content traction. Increasing original investment drives subscriber growth across 1.4B potential viewers.

02 Target Underserved Markets

Kenya, Ghana and Ethiopia are underrepresented relative to population and rising middle class income. Targeted content builds first-mover advantage.

03 Optimise Post-Pandemic Strategy

Content additions peaked in 2020 and normalised. A data-driven quarterly scheduling model improves spend efficiency across EMEA.

04 Diversify Content Ratings

TV-MA dominates EMEA. Increasing family and general audience content across African markets broadens demographics and reduces churn.

05 Consolidate Vendor Management

Vendor spend is 30% of production budgets across all markets. A consolidated EMEA vendor strategy yields significant cost efficiencies at scale.

NETFLIX

Data tells the story.

Analysts make it matter.
